Chief Technology Officer*

Ken Berryman,
*Senior Vice President,
Strategy*

CORPORATE OVERVIEW

Information is the lifeblood of today's connected world. It plays a critical role in our personal lives and drives our businesses. Each year, the amount of information we create increases exponentially and securing and managing our information-driven world becomes even more important and challenging. Customers are increasingly concerned about how to protect their increasing amounts of information – from digital photos to business critical data.

Symantec™ is a global leader in providing security, storage and systems management solutions to help our customers – from consumers and small businesses to the largest global organizations – secure and manage their information against more risks at more points, more completely and efficiently than any other company. Our company's unique focus is to eliminate risks to information, technology and processes independent of the device, platform, interaction or location.

GLOBAL PRESENCE

Symantec is committed to delivering global solutions that meet local needs. To do that, we have operations in more than 40 countries, including research and development facilities and 24x7 Security Operations Centers and Security Response Labs located around the world. Symantec has established some of the most comprehensive sources of Internet threat data in the world through the Symantec Global Intelligence Network. This network captures worldwide security intelligence data that gives Symantec analysts unparalleled sources of data to identify and analyze, to deliver protection and provide informed commentary on emerging trends in attacks, malicious code activity, phishing, and spam.

More than 2,000 professionals support our customers globally in 29 centers and 10 languages. We hold more than 600 patents in our global patent portfolio, addressing security, systems management and storage needs for consumers, small businesses and enterprises.

SOFTWARE AND SERVICES PORTFOLIO

Symantec's portfolio of software and services protects completely, in ways that can be managed easily and with controls that can be enforced automatically – enabling confidence wherever information is used or stored. Our market-leading solutions help customers ensure that their information is secure and well-managed.

Symantec's Norton™ brand of award-winning **Consumer Products** for individual users, home offices and small businesses focuses on delivering online protection of our customers, their systems and the things they value most – photos, documents, videos, and music – without compromising system performance. Our Norton brand of products and services range from Internet security and backup and recovery solutions to PC tune-up and PC help services that assist our users to resolve their computer problems and allow them to get the most out of their PC.

- Consumer Endpoint Security (#1 market position¹)

Security and Compliance focuses on providing large, medium and small-sized businesses with solutions for information risk management, endpoint security and management, data loss prevention, and endpoint virtualization. Our standardized security and management solutions ensure that information, infrastructure and processes can be protected, managed and controlled across physical and virtual platforms.

- Endpoint Security (#1 market position², Positioned in Leader's Quadrant in Gartner Magic Quadrant³)
- Messaging Security (#1 market position⁴, Positioned in Leader's Quadrant in Gartner Magic Quadrant leader⁵)
- Policy & Compliance (#1 market position⁶)
- Email Archiving (#1 market position⁷, Positioned in Leader's Quadrant in Gartner Magic Quadrant⁸, Forrester Wave leader⁹)
- Data Loss Prevention (#1 market position, Positioned in Leader's Quadrant in Gartner Magic Quadrant¹⁰ and Forrester Wave leader¹¹)
- Security Management (#1 market position¹²)
- Security Information & Event Management (SIEM) (Positioned in Leader's Quadrant in Gartner Magic Quadrant¹³)
- Network Access Control (Positioned in Leader's Quadrant in Gartner Magic Quadrant¹⁴)
- Endpoint Management (Positioned in Leader's Quadrant in Gartner Magic Quadrant¹⁵)

Storage and Availability Management focuses on providing enterprise and large enterprise customers with storage management and high availability as well as data protection solutions across heterogeneous storage and server platforms.

- Storage Infrastructure Software (#1 market position¹⁶)
- Core Storage Management Software (#1 market position¹⁷)
- Data Protection (#1 market position¹⁸)

Symantec Services offers deep technical knowledge and expert resources including, consulting, managed services¹⁹, hosted and support and education Services. With a staff of 4,000 professionals and an extensive partner network, we help customers address information security, availability, storage, and compliance challenges from the endpoint to the data center.

CORPORATE RESPONSIBILITY

Symantec is committed to fulfilling our core purpose of securing and managing your information-driven world with full attention to and respect for ethical operation, the environment, and positive societal impact. Symantec is vigilant in maintaining strong governance and ethics policies and procedures. We encourage energy conservation and waste reduction throughout our operations and also provide software and services to help customers manage their own energy and emissions impacts.
