

SonicWALL, Incorporated

CORPORATE

Redefining high performance network and data protection

Breakthroughs in real-time applications, remote access and mobility have extended the value of business networks, but have also created new conduits for evolving threats. And today while criminals spend billions globally on financially motivated attacks, you must defend your organization within ever-tighter budget restraints.

In the past, organizations had to settle for esoteric security solutions targeting single-point threats like viruses, spam and intrusions as they arose, often adding complexity and expense without corresponding value. Today, security technology has evolved, and organizations demand simpler, well-engineered and cost-effective solutions.

SonicWALL® streamlines the complexity out of security, allowing all organizations to leverage the Internet and their networks to enhance productivity, while maintaining the confidentiality, integrity and availability of their information assets. SonicWALL enables you to break free from the compromised status quo of premium-priced, overly complex legacy systems with solutions that offer higher performance protection, including greater management simplicity and lower total cost of ownership. By relentlessly innovating to drive the costs and complexity out of building and running high performance secure infrastructure, SonicWALL offers organizations exceptional value in:

- **Affordable acquisition** by standardizing to commercially available hardware, maximizing supply chain efficiencies, and leveraging SonicWALL's leading-edge software development across the entire product line to drive down costs of high-performance network security for organizations of all sizes.
- **Ease-of-deployment** by delivering elegant, simplified solutions that are fast and easy to set up, even in the most demanding network infrastructures.
- **Streamlined management and operations** by providing globally-managed, centrally-administered products and dynamic security services that deliver real-time threat and data protection.

SonicWALL backs this approach with a recognized commitment to continuous innovation and nearly twenty-years of dedication to the long-term support and dynamic growth of its technology. As your organization grows, and as security threats continue to evolve, you can count on SonicWALL will grow and evolve with you. SonicWALL is committed to providing organizations of all size with solutions of greater value than the competition, at a significantly lower total cost of ownership, through purpose-built solutions designed to address the unique requirements of each customer.

Higher Performance Protection

SonicWALL engineers dynamically intelligent services, software and hardware that seamlessly integrate into a comprehensive offering of higher performance security solutions for network security, secure remote access, e-mail security/anti-spam and backup and recovery. Our market-leading Unified Threat Management technology brings world-class anti-virus, anti-spyware and intrusion prevention to wired and wireless networks of all sizes, in one globally-managed solution. SonicWALL's global network of strategic partners, resellers and distributors are some of the best-known names in information technology. This higher performance protection breakthrough provides full network protection that doesn't compromise performance. SonicWALL's rich portfolio of security solutions provide millions of our customers with the comprehensive protection necessary to safeguard their businesses—not just their networks.

Award-winning Leadership

Established in 1991, SonicWALL is the global leader of high performance network and data protection solutions for small, mid-sized and enterprise organizations. Earning high recognition from key industry publications, SonicWALL products have been recognized with seven 5-Star reviews from SC Magazine over the past year. Other awards include: 2009 InfoWorld Technology of the Year for Networking and Security, SC Magazine 2009 Award finalists, eWeek's Channel Insider 2008 Products of the Year, and SearchNetworking.com's 2008 Product Leadership. With over 15,000 channel partners and more than a million deployments worldwide, SonicWALL has won top honors in the VAR Business Annual Report Card in the security appliance category in four out of the past 5 years. SonicWALL is rated among the top three brands among U.S. resellers according to CMP's VAR Business.

SONICWALL®

PROTECTION AT THE SPEED OF BUSINESS™

SonicWALL is a Global Organization

- 25 offices in 19 countries
